

iWay Software's suite assembles powerful, pre-built components for enterprise-class integration scenarios – without custom code – delivering the fastest, most cost-effective, and simplest way to integrate business processes and achieve the promise of SOA: true reusability.

## iWay Software Solutions for SAP

### Maximize the Value of SAP in Your Integration Strategy

Organizations have implemented ERP systems like SAP to streamline financial and operational processes, enabling quick response to dynamic conditions in the global market. Due to the free-for-all software purchasing, mergers, and acquisitions of the past decade, however, organizations now find themselves with an assorted mix of ERP systems and other applications, all of which house mission-critical data.

Leveraging strategic investments in systems like SAP requires a solution that allows organizations to make fast and accurate business decisions, based on the data in all of their enterprise systems. What they need is solutions that give them the ability to access and integrate all enterprise data (including SAP and non-SAP sources) in real time, turn it into relevant, consistent information, and provide rapid information delivery to users across the enterprise. iWay Software adapters for SAP are designed to help SAP customers achieve this strategic vision.

### Seamless Integration Equals Highly Relevant, Accurate, and Consistent Mission-Critical Information

iWay adapters for SAP significantly reduce the risk, cost, and time associated with moving or transforming data and applications – for building a data warehouse, or even integrating your data silos without moving the data.

To maximize the value of your existing SAP investment, iWay Software's adapters integrate with the SAP environment at numerous levels, creating an infrastructure that:

- Accesses SAP BW through the OLAP BAPI interface, allowing users to transparently include dynamic operational data from any SAP data source within any application
- Fully integrates with the SAP NetWeaver open integration and application platform, providing BI capabilities to users of the SAP Enterprise Portal
- Leverages existing Web services built into SAP NetWeaver's Enterprise Services Architecture (ESA), obtaining the maximum value from existing investments in SAP solutions
- Enables rapid deployment of large-scale, self-service applications
- Can be deployed on the SAP Web Application Server, simplifying the overall IT infrastructure while driving down your total cost of ownership
- Leverages SAP security by enforcing role-based authorizations as defined in SAP

## Find Out More

To see how we can help you succeed, visit us at [iwaysoftware.com](http://iwaysoftware.com), e-mail us at [info@iWaySoftware.com](mailto:info@iWaySoftware.com), or in the U.S. and Canada, call toll-free **(866) 297-4929**.

### Robust Integration for SAP Environments

With the ability to directly access SAP BW, SAP R/3 Enterprise, and more than 300 data sources and applications, iWay Software empowers the extended enterprise – including partners and customers – to meet their unique information requirements in real time.

iWay Software's SAP capabilities enable the following:

- Powerful display and control options for SAP BW hierarchies, including the ability to take full advantage of SAP BW hierarchies through a drag-and-drop interface
- Integration with the SAP data dictionary, providing direct access to user-friendly business descriptions and comprehensive metadata
- Flexibility to access BW InfoCubes directly or leverage existing BEx queries
- Customizable metadata views that are easy to understand and change without impacting the SAP BW environment
- Dynamic generation of ABAP code via the SAP R/3 adapter, enabling complex reporting with cross-module joins and reducing the need for ABAP programming resources

### SAP-Certified Solutions

SAP has recognized the benefits of iWay Software's adapters for SAP, and has certified them to be Powered by SAP NetWeaver. This means you can confidently deploy integration with the SAPWeb Application Server Release 6.40 or higher and deliver certified iViews into the SAP Enterprise Portal. And because our solutions for SAP are tightly integrated with SAP, your security investment is protected, ensuring the safety and integrity of your information systems.
